## TRU-LIFT Automatic Tonearm Lifter (MACHINED BRASS or STAINLESS STEEL) Deluxe Plus Package

TRULIFT-81881 (Machined Brass)

TRULIFT-81882 (Stainless Steel)

MSRP: \$259.95. USD

**pcX Price: \$199.95 USD**

The Tru-Lift Automatic Tonearm Lifter is designed to protect your precious record collection. It's made from the highest quality materials and features an oil-filled hydraulic lifter that will raise the turntable's stylus when your cartridge has played its final tune.

**Product Features:**

- Allows you to enjoy your music without the anxiety of running back to save your record.
- A smooth, automatic lift – no jerking.
- Fully-adjustable.
- A beautiful design that looks great on any table.
- Available in stainless steel or machined brass.
- Canadian-Made Space Age Hydraulic Technology: The only other Canadian arm with more NASA-type tech is the Canadarm – but now it's collecting dust inside the Space Shuttle, so the Tru-Lift is your best bet.

**“The fluid dampened hydraulic lifter will automatically go up... in a slow, but elegant manner, rescuing your very precious and expensive cartridge.”**

- Richard H. Mak, Mono and Stereo Senior Analog Contributing Writer
